Key Trends Driving Innovation

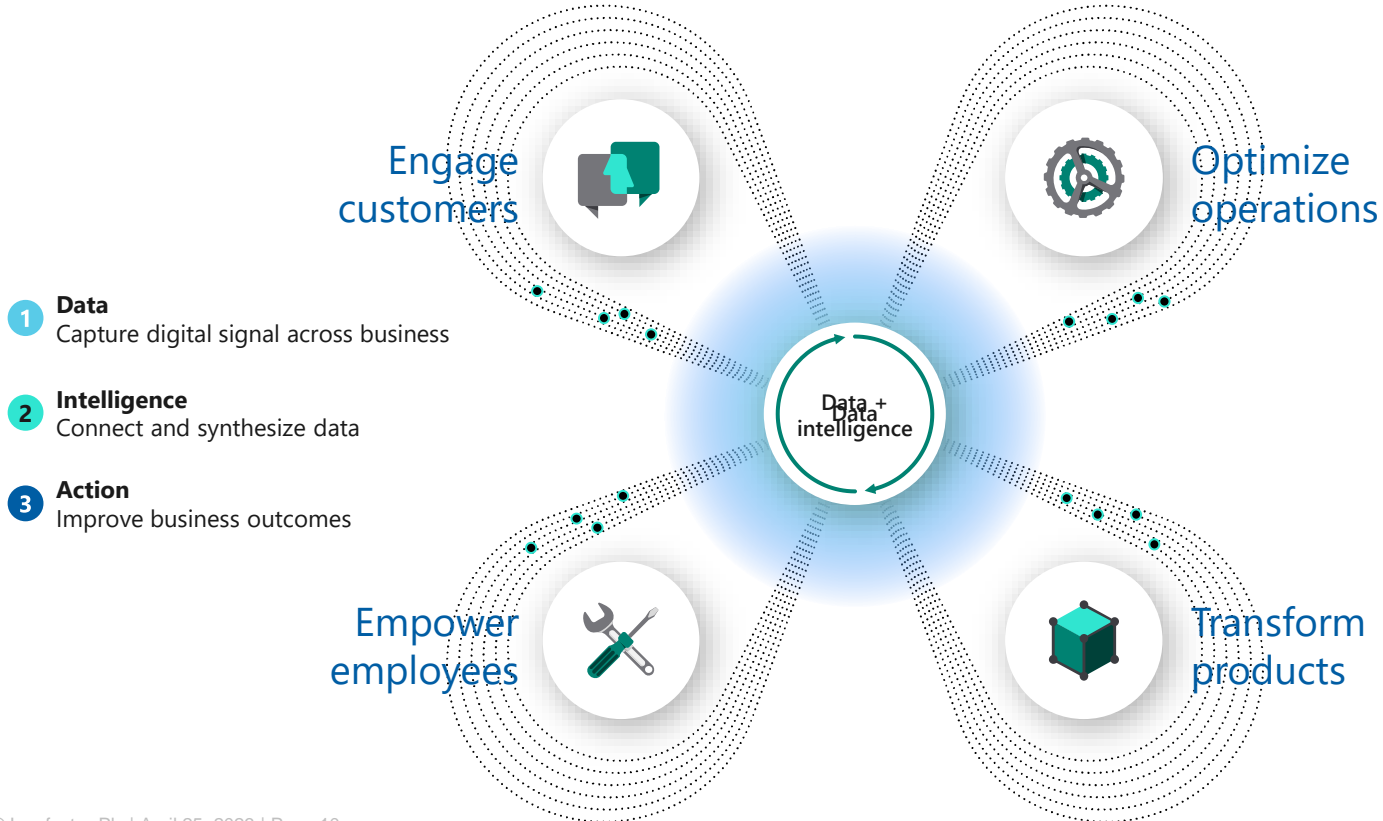

Our mission is to drive the modern digital organization.

Key Stakeholders of B-to-B Digital Transformation

Digital Feedback Loop

Innofactor Solution Offering

Modern Digital Organization
Framework and Innofactor's
6 solution areas

Digital Services

We enable you to turn business models and processes into easy-to-use digital services and provide you with continuous agile development capabilities through a long-term partnership

Cloud Infrastructure

We help you to design, implement and operate secure and scalable cloud platforms to grow your digital business.

Business Solutions

We help you build business agility by optimizing your digital business capabilities with intelligent business applications.

Data and Analytics

We help you to build a scalable data platform that enables data-driven decision-making leveraging AI, Advanced Analytics, BI, Master Data Management, Real-time Analytics and IoT.

Information and Case Management

We help you with information work and document management in the hybrid world, ranging from formal and standardized case and records management to informal teamwork and collaboration

Cybersecurity

We help you adapt to the fast-changing cybersecurity landscape and proactively build trust to make the benefits of a digital world available for everyone.

#ModernDigitalOrganization

Innofactor Solution Offering

Modern Digital Organization Framework and Innofactor's 6 solution areas

We've built a framework for a modern digital organization. We use it to help our customers build clarity and determine their current state and then form a vision and roadmap for their next steps in digitalization and new technology adoption based on their objectives.

Our framework covers all aspects of digitalization and is split in six solution areas.

We help our customers to successfully plan, deploy and implement new business models, processes and solutions in each area to move forward on their journey to becoming a modern digital organization.

We focus on the Microsoft ecosystem's Business-to-Business solutions whose markets are growing faster than the IT market on average.

#ModernDigitalOrganization

Storyboard

Evaluating the customer's current state and helping them shape the digital vision for their organization

Foundation

Defining the structure and governance needed to implement new solutions

Implementation and Delivery

Developing, tailoring and deploying the solution based on proven concepts and platforms

Adoption

Focusing on ensuring that the organization and users adopt the new solution so that its benefits are fully realized

Managed Services and Continuous Development

Ensuring the solution is continuously managed and developed and meets the organization's future needs

Skanska Sweden

Skanska is one of the world's leading providers of construction and project development services. It is active in both construction and the development of residential and commercial premises. Founded in 1887, Skanska has locations in 10 countries across Europe and the USA. In Sweden, the company employs over 8,000 people.

Skanska needed to revise its processes for business planning and corporate management, as well as the IT tool used for those activities, which had been used by the management since 2015. One reason behind this was that Skanska was no longer able to use the SharePoint on-premises solution that had previously been the basis of the Styrportalen ("management portal") tool. The main target groups for the Styrportalen portal are Skanska Sweden's management teams. There was also a need to bring in management teams from a new organizational level. This meant an increase from the previous 30 internal organizations to 120.

Skanska contacted Innofactor at the recommendation of Microsoft. A collaboration was sketched out with the aim of developing a new goal management solution based on Microsoft Power Platform tools. The result of the collaboration was a new Styrportalen 2.0 solution, which has made Skanska's business planning and management activities more consistent, structured, and seamless. The goal management tool provides a better overview of the content of business plans and increases transparency between Skanska's internal organizations.

Styrportalen 2.0 takes advantage of many different Microsoft Power Platform solutions. Power Apps was used for building a shared structure for all business levels, with components such as targets, actions to be taken, and key performance indicators (KPIs), as well as interfaces for reporting the KPI results, statuses, and comments. The processing and storage of data in the applications is now achieved reliably and efficiently via the Dataverse data platform. The Power BI visualization tool provides Skanska with a consistent, transparent, and dynamic tracking and management tool. Power Automate is used to automate processes and manage authorizations in the Styrportalen portal, which contributes to more efficient IT administration.

"With the new Styrportalen portal, we have expanded its usability to all our organizations with business plans, while at the same time making the administration less resource-intensive. Since we went live with Styrportalen in May 2022, we've also gotten positive responses to the new operating methods and tools from the management groups in this organization."

Jonna Brattlöv
Development Manager
Skanska Sverige

“The benefits are clear to see, and the users have quickly embraced the new system. The usability of the system is nicely aligned with the content of our work. Thanks to customization, there are no unnecessary buttons.”

Suvi Jokela
Project Manager
City of Tampere

City of Tampere

Tampere, the third-largest city in Finland, wanted to create better conditions for the growth and renewal of local businesses and employers. To achieve this goal, the city's various units and organizations needed to increase their co-operation and build more consistent customer processes. Customer relationship management was identified as a bottleneck to co-operation, as each of the city's units and organizations had different systems for it.

The city wanted a new solution that could be used to import a wide range of data from different sources and that would comprehensively take into account the priorities of all of the city's organizations. The new system also needed to be compatible with the Microsoft environment. It soon became clear that Microsoft Dynamics 365 would be a natural choice due to its adaptability, ease of integration and other key functionalities that help the city's units perform smoothly on a day-to-day basis. From the City of Tampere's perspective, the new solution is particularly useful because dynamically updated company information from various organizational sources can be merged directly in Dynamics. Being able to switch on integrations at the push of a button saved a significant amount of time and money.

The project was completed seamlessly in spite of the fact that engaging the entire organization in a development effort was a new challenge for the City of Tampere, and many of the members of the project team did not even know each other beforehand. The end users are satisfied, as they find Dynamics to be a clear and simple system. Inspired by the positive experiences, the City of Tampere will roll out the new CRM solution in 2023 in new units and in enterprises that are fully or partially owned by the city. Many units have also decided to expand the solution by adding the marketing module. Microsoft technology is also used in the management of immigrant integration and land use lifecycle management.

Greater Stockholm Fire Brigade

The Greater Stockholm Fire Brigade (Storstockholms brandförsvär) is a Swedish municipal association for the member municipalities Danderyd, Lidingö, Solna, Stockholm, Sundbyberg, Täby, Vallentuna, Vaxholm, Värmdö, and Österåker. In accordance with the mission it has been given by the municipalities, the fire brigade is responsible for rescue operations and the prevention of fires, other hazards, and accidents. The fire brigade's 10 member municipalities have a combined population of approximately 1.3 million. The population is growing, which is expected to lead to an increased need for rescue services. The Greater Stockholm Fire Brigade also works together with other rescue services to optimize the allocation of resources in responding to emergencies.

To respond to its changed risk landscape and increasingly complex case management, the Greater Stockholm Fire Brigade launched a public procurement competition for a new case and document management system in 2022. After a careful selection process, the fire brigade chose Innofactor's Dynasty solution. The procurement includes the provision of maintenance and support services, initially for a period of four years, with an option of extending the term to eight years.

The aim of the collaboration is to deploy a new, modern, and user-focused case and document management system that also includes archival functionality that corresponds to the fire brigade's current and future needs. The fire brigade gains access to a coherent solution that supports its core processes, and a system that takes compatibility and future requirements into account.

The collaboration with Innofactor began in August 2022. The solution is based on the Innofactor Dynasty software suite, which includes a number of carefully specified out-of-box functions and coherent user interfaces. Other modern systems can also be easily integrated into the suite. In accordance with the fire brigade's wishes, the system will be delivered as an on-premises service that is supported, maintained, and developed by Innofactor. Innofactor also provides consulting support in the form of regular system configuration, customization, and training.

It is especially important for the fire brigade to ensure usability in times when society's other functions and infrastructure operate only on a limited basis. Another key goal is to increase the efficiency of case management through automated workflows to the extent that it is sensible and appropriate.

"The previous case management systems did not correspond to our organization's needs. We wanted to find a system that provides modern, carefully specified, and ready-to-use functions that are well suited to our process-style workflows. We are pleased to start using a coherent solution that also meets the fire brigade's future needs."

Robin Haglund
Unit Director
Greater Stockholm Fire Brigade

“Innofactor’s specialists have always helped us solve challenges related to our cloud transformation. They have been like a good friend that we can call whenever something goes wrong.”

Jana Hartwich
Director
IT & Commercial Services

GLS Denmark

GLS Denmark, a package distributor that is part of the international GLS Group, has operating locations in seven cities in Denmark. The company’s headquarters are located in Kolding in southern Denmark. GLS has annual net sales of approximately DKK 2.4 billion, or about EUR 320 million.

A few years ago, GLS made the decision to implement a cloud strategy that would see all of its legacy systems moved to the cloud by 2025. The motivation to migrate to the cloud was driven by the continuous growth of business-specific data related to package data and scanning, and the resulting performance challenges. The change has already been significant with regard to GLS’ operations: initially, the company had no cloud computing expertise of its own, but now it has a full-fledged cloud-based production environment that has already generated business benefits.

The first project under the new cloud strategy was to develop a package tracking application for consumers. The project turned out to be a tremendous success in spite of being a move into an entirely new area for GLS. The application became one of the most popular applications in the AppStore and now has 750,000 users in Denmark. The large user volume has been enabled by the cloud environment, as an application implemented with on-premises servers would have had a maximum user volume of approximately 200,000.

In addition to direct business success, the cloud-focused strategy has also delivered other benefits to GLS. The transition to the cloud required the organization to collaborate closely in teams, which helped erase the traditional boundaries between development and use. Indeed, the new approach has helped bring in a new culture of co-operation in the organization.

Pohjantähti

Pohjantähti is an insurance company providing individual and corporate customers with comprehensive insurance services through over 20 offices in locations ranging from Helsinki to Rovaniemi. Pohjantähti is owned by its customers and its head office is located in Hämeenlinna. The company has over 400 employees, of whom 100 work in claims services in Hämeenlinna and Tampere. The co-operation between Innofactor and Pohjantähti can be traced back to 2019, when Invenco Oy (then under private ownership) began to implement a new BI architecture solution for the insurance company. Innofactor acquired the share capital of Invenco in a transaction completed on June 30, 2022.

Pohjantähti wanted to complement its original BI architecture solution with a harmonized data warehouse platform that includes role-based Power BI reporting applications and scorecards for the users. Innofactor implemented a solution for Pohjantähti that integrates all of the key areas of insurance operations in a single data model. In addition, the layers of the SQL Server 2019 technology used in the solution have been optimized to ensure the best possible performance.

The end-users of the new solution are particularly satisfied with the speed of the in-memory SSAS tabular cube. They are also pleased with the way the various areas of insurance operations have been integrated in a single data model, even with billions of items of data. The partner's role has been crucial in enabling Pohjantähti's management and other parts of the organization to use the results of reporting in their day-to-day work.

"You've done a great job. I find that our reporting – and, simultaneously, our understanding – has increased tremendously over the year. Business development is directly linked to reporting now that you have created the opportunity to analyze our operations and understand the outcomes of our decisions."

Aki Kiiliäinen
CEO
Pohjantähti

“Using more modern and secure cloud technology with Microsoft 365, Azure and Power Platform enables more possibilities for innovation, both internally and for our customers.”

Pär Persson
Chief Digital Officer and Head of IT
JOAB

JOAB

JOAB, the Nordic region's largest supplier of supplementary parts in the trucking industry, develops innovative solutions and services within the trucking industry. Examples of its products include ship loaders, cranes, and hook lifts. The company's field of expertise ranges from the production and assembly of supplementary parts for trucks to service and aftermarket services. JOAB's main office is located in Gothenburg, and it has 270 employees.

Having achieved strong growth, JOAB made the strategic decision to move its IT infrastructure to the cloud as part of scaling up its business in line with the company's growth strategy. JOAB's Board of Directors also emphasized that improving data security was an important factor in the decision. When JOAB began preparing for its migration to the cloud, it recognized the need for external expertise. The company started to look for a partner that could provide guidance in the transition to modern cloud solutions. Innofactor was chosen as JOAB's partner due to its strengths: extensive experience and technical expertise in the Microsoft ecosystem, including data security.

In the initial phase of the cloud transition, data security in a modern hybrid work model was one of the most significant projects. As JOAB wanted solutions that would enable targeted follow-up measures, one of the choices was Microsoft Secure Score in Azure. It enables the company to maintain a suitable data security level, and multi-factor authentication (MFA) has also significantly improved data security. Limited access via certified units makes logging in both simpler and more secure for the users. The concrete results include improved user traceability and a reduction in the number of incidents.

The cloud-based IT environment puts JOAB in an excellent position to create new innovations and improve its competitiveness in the future. One option was the deployment of a cloud-based intranet to further enhance data security and internal co-operation.

Strategic choices, working principle and values

Moving forward in a sustainable way

- Through sustainability, we meet the expectations of our stakeholders and ensure long-term business continuity
- An important milestone in our sustainability journey was reached in the fall of 2022, when we calculated Innofactor's carbon footprint
- In accordance with our PeopleFirst theme, we invest in the well-being and development of our personnel
- We also see employing young graduates as a key focus in our sustainable operations: we recruited in the Nordic countries 37 graduate students in our DigiStar program in 2022
- Innofactor's new Nordic sustainability task force has started to operate in 2022

A group photograph of seven members of the Executive Board of the Innofactor Group. They are posed in two rows against a dark blue, vertically-pleated curtain background. The front row consists of four people seated on chairs: an older man with glasses in a dark suit, a woman in a patterned blue and orange dress, a man in a dark suit, and a man in a blue suit with glasses. The back row consists of three people standing: a man in a blue suit, a woman in a patterned dress, and a man in a blue suit with glasses. The overall lighting is professional and focused on the group.

Microsoft Has the Leading Ecosystem in Innofactor's Strategic Focus Areas

- Microsoft is the leading global provider in Innofactor's strategic focus areas
- By focusing on the Microsoft ecosystem Innofactor can attract the best talent and know-how and have close relations to Microsoft
- If Microsoft were to lose its leading position in some areas Innofactor could transition to other partners in these areas

Innofactor Competitive Positioning in the Nordic EUR 10+ Billion Microsoft IT Services Market

Nordic IT services market
25+ billion euro*

Large companies, in every Nordic Country, all solution areas, and several technologies
- E.g. TietoEvry, CGI and Fujitsu

Nordic Microsoft IT-services market
10+ billion euro**

Mid-sized, not in all Nordic Countries, several technologies
- E.g. Siili, Solita, Digia, Netcompany and Precio

Our Competitive Advantage:
- leading know-how in Microsoft-based solutions
- productized offering

Our Competitive Advantage:
- more skilled local professionals
- better productized offering
- more flexible mode of operation

INNOFACTOR®

Our Competitive Advantage:
- Trustworthiness of a listed company
- Established processes
- Strong customer references.

Our Competitive Advantage:
- leading know-how in Microsoft-based solutions
- stronger industry focus & knowledge
- Broader offering

Mid-sized, in every Nordic Country, focusing on specific solutions
- E.g. Atea, HiQ, and Knowit

Q1/2023 Results

Innofactor's strong growth continued in the first quarter of 2023

Net sales in the first quarter of 2023 amounted to EUR 20.2 million, representing year-on-year growth of 19.2 percent. The rate of organic growth, excluding the Invenco business acquired in June 2022, was 10.9 percent.

The operating margin (EBITDA) increased by 21.8 percent year-on-year and was EUR 2.5 million (12.3 percent of net sales). EBITDA was positive in all of our operating countries.

The order backlog at the end of the quarter was EUR 76.3 million (2022: 71.3), representing year-on-year growth of 6.9 percent.

	Q1 2023	Q1 2022	Change (%)	CEO's comment
Net Sales (kEUR)	20,223	16,964	+19.2 %	<i>" Net sales in the first quarter of 2023 amounted to EUR 20.2 million, representing year-on-year growth of 19.2 percent. The rate of organic growth, excluding the Invenco business acquired in June 2022, was 10.9 percent."</i>
EBITDA (kEUR)	2,487	2,042	+21.8%	<i>" The operating margin (EBITDA) increased by 21.8 percent year-on-year and was EUR 2.5 million (12.3 percent of net sales). EBITDA was positive in all of our operating countries."</i>
Order Backlog (kEUR)	76,293	71,336	+6.9 %	<i>" The order backlog at the end of the quarter was EUR 76.3 million (2022: 71.3), representing year-on-year growth of 6.9 percent."</i>
Equity Ratio (%)	47.3 % (51.3 %)*	51.7 % (56.5%)*	-8.6 %	<i>"Innofactor's operating cash flow for the review period January 1–March 31, 2023, amounted to EUR 3.9 million (2022: EUR 2.7 million). The equity ratio in 2022 was reduced by a loan of approximately EUR 2.5 million taken in relation to the Invenco Ltd acquisition, as well as increased lease liabilities due to extensions of leases. Innofactor's strong operating cash flow supports the company's strategic goal of profitable growth and securing a solid financial standing in all situations."</i>

Increased revenue is typically reflected immediately in EBITDA

Increased order backlog effects the revenue typically with 1 to 2 quarter delay...

... and also requires the number of employees growing to deliver the new deals received

Broad Customer Base, Long-term Contracts and Business Footprint in The Nordic Countries Bring Scalability and Stability

Distribution of net sales January 1 to March 31, 2023

- Strong customers in public and private sectors bring stability in economic fluctuations
- 10 largest customers account for approximately 29% of net sales
- SaaS and license revenue bring competitive advantage, scalability, stability and profitability
- Sales of consultant's work moving increasingly to frame agreements and continuous development
- Sweden, Denmark and Norway represented a significant portion of Innofactor's revenues
- Innofactor's objective is to create a strong position in all Nordic countries

*) The Innofactor Group monitors the number of active personnel. The number of active personnel does not include employees who are on leave for more than 3 months.

Our long-term financial goals are annual growth of about 20 percent, approximately 20 percent EBITDA in relation to net sales, and maintaining positive cash flow and a solid financial standing in all situations.

Realization of the strategy in the review period 2023

- Target 1: Ca 20 percent yearly growth, mainly organic growth
 - Net sales increased by 19.2 percent compared to the previous year. Organic growth was 10.9%, excluding the Invenco business acquired in June 2022
 - The EUR 76.3 million order backlog supports the revenue growth target.
 - Innofactor aims to continue to take measures that support the growth of net sales.
- Target 2: Ca 20 percent EBITDA
 - EBITDA was 12.3 percent of revenue, increasing by 21.8 percent. Still some work needed to reach the 20% profitability target.
 - Actions to improve our performance and revenue will also increase our EBITDA
- Target 3: Positive cash flow and financial solidity in all situations
 - Innofactor operative cash flow was EUR 3.9 million, increase of 43.5 % and equity ratio at the end of review period was 47.3 percent.
 - The equity ratio was reduced by the loan of approximately EUR 2.5 million taken out in June 2022 for the purpose of the Invenco Oy acquisition, as well as increased lease liabilities due to extensions of leases
 - Strong operative cash flow and good financial position support the strategic growth target securing solid financial standing in all situations.

The key actions to be taken to achieve growth of approximately 20 percent and EBITDA of approximately 20 percent

- 1. We will improve the efficiency of our operations and increase our invoicing rate** by five percentage points. This will be achieved by, for example, improving the management of project and service contracts, enhancing the cross-resourcing of personnel between countries and units, reducing employee turnover and developing our self-directed team models.
- 2. We will increase the share of licenses and SaaS services** to over 33 percent of net sales from the current level of approximately 27 percent. This will be achieved by, for example, developing our offering, such as the new MDRaaS service (CSOC) and by focusing our sales efforts on customers and solution areas with the highest growth potential and that present the best opportunities for scaling our existing offering in each of the Nordic countries.
- 3. We will increase the number of employees engaged in invoiced services.** This will be achieved by, for example, doubling our recruitment of new university graduates to over 60 employees in 2023, concentrating the recruitment of senior professionals to our Nordic recruitment team, increasing the competence of our employees through certifications, reducing employee turnover, improving the efficiency of subcontracting and investing in the development of our employer brand.
- 4. We will become an even more proactive player in the Nordic M&A field.** This will be achieved by, for example, through the internal reorganization of operations, emphasizing the role of country directors in actively seeking new potential acquisition targets in their respective countries.

Dividend Distribution

- According to the policy, the aim of the Board of Directors is
 - to pay a dividend regularly each year
 - to pay about half of the result for the financial period in dividends, taking into account the company's financial position, possible corporate reorganizations and other development needs
- Board of directors proposes that
 - distribute repayment of capital amounting to **EUR 0.06** per share
- In addition Board of directors proposes that
 - To authorize the company's Board of Directors to decide on a potential extra dividend and repayment of capital of maximum EUR 2,459,293 (**EUR 0.06** per share taking into account the share issue authorization proposed to the Board of Directors)

Innofactor's net sales and operating margin (EBITDA) in 2023 are estimated to increase from 2022, during which net sales were EUR 71.1 million and operating margin was EUR 7.8 million.

Other Issues

Stock Exchange Releases in Q1/2023 (1/3)

- On February 13, 2023, Innofactor issued a stock exchange release to announce that Innofactor and **Metso Outotec Plc** have signed a contract to continue the digitalization of the company's quotation process. Innofactor will continue the development work started in 2020 to design and implement, using agile methods, a cloud-based solution for managing the quotation process and handling and storing related information and documents. The solution is implemented using Microsoft Azure PaaS cloud services. The value of the agreement (excluding VAT) is at most **EUR 0.70 million** and the services will be delivered during the year 2023.
- On February 16, 2023, Innofactor announced in a stock exchange release that **Senate Properties** has selected Innofactor with a procurement decision to continue the development and maintenance of an HR system. The system is based on the Innofactor Kide HR solution. Innofactor estimates the total value of the procurement at approximately **EUR 0.8 million**.

Stock Exchange Releases in Q1/2023 (2/3)

- On February 17, 2023, Innofactor announced in a stock exchange release that the Board of Directors of Innofactor Plc has decided, based on the authorization granted to it by the Annual General Meeting, on a **share-based incentive plan for all of Innofactor Group's personnel** in order to commit the personnel to the company and its goals ("Personnel Share Issue"). In the Personnel Share Issue, a maximum total of **400,000 shares** ("Personnel Shares") of the company will be issued to the Innofactor Group's personnel, deviating from the shareholders' pre-emptive subscription rights. At the time of making the decision Innofactor Plc had 37,388,225 shares. Innofactor Plc's shares which are in the company's possession will be used for the Personnel Share Issue. The subscription price for the Personnel Shares will be EUR 1.01 per share. The share subscription price is based on the trade volume weighted average price of the company's share on Nasdaq Helsinki Ltd for the previous month and on a discount of 10 percent thereof.
- On March 1, 2023, Innofactor issued a stock exchange release to announce that **Innofactor Plc has completed its share buy-back program**. The repurchases of the shares began on September 29, 2022, and ended on February 28, 2023. During that period, **Innofactor repurchased 800,000 of its own shares** for an average price per share EUR 1.0550. The shares were acquired at the current market price in the public trading arranged by Nasdaq Helsinki. The purpose of the acquisition of the company's own shares is to develop the company's capital structure. Following the repurchases, Innofactor holds a total of 1,491,410 of its own shares.

Stock Exchange Releases in Q1/2023 (3/3)

- On March 20, 2023, Innofactor issued a stock exchange release to announce that **Innofactor Plc's directed personnel share issue was fully subscribed**. Subscriptions were made by a total of 211 of the Group's employees. Subscriptions were made in all of Innofactor's operating countries: Finland, Sweden, Denmark and Norway. The shares subscribed for in the personnel issue are subject to a transfer restriction until March 31, 2024. The subscribed shares will be transferred to the subscribers by the end of March 2023, after which the company will hold 1,091,410 shares. The subscription price of EUR 404,000 for the personnel shares will be recognized in total in Innofactor Plc's unrestricted equity.

Key points from CEO's review

- **Net sales:** Net sales in the first quarter of 2023 amounted to EUR 20.2 million, representing year-on-year growth of 19.2 percent. The rate of organic growth, excluding the Invenco business acquired in June 2022, was 10.9 percent.
- **EBITDA:** . The operating margin (EBITDA) increased by 21.8 percent year-on-year and was EUR 2.5 million (12.3 percent of net sales).
- **Order backlog:** The order backlog at the end of the quarter was EUR 76.3 million, representing year-on-year growth of 6.9 percent.
- **Personnel:** We want to focus on training young people and offering jobs to new graduates. In 2023, we are organizing our fifth Innofactor DigiStar Trainee Program. Our target for 2023 is to increase the number of DigiStar participants to over 60, up from 37 last year.

During the first quarter, we carried out a directed personnel share issue with a record-high number of 211 employees participating. Subscriptions were made in all of Innofactor's operating countries: Finland, Sweden, Denmark and Norway.
